

Application for an Out-Of-State Inspection of a Delaware Registered Vehicle

*This application must be completed and returned to the Delaware Division of Motor Vehicles, **Emission and/or OBD II printout readings, applicable fees, and a copy of your valid insurance card.** Please mail all documents to: Division of Motor Vehicles, Correspondence Section, P.O. Box 698, Dover, Delaware 19903.

Dear Valued Customer:

The Delaware Division of Motor Vehicles requires vehicles to be inspected for SAFETY and EMISSIONS prior to an out-of-state renewal. Take your vehicle and DMV Form 210(a), to a repair facility or state operated inspection lane (if applicable) at your location for inspection. Ensure ALL items are completed on the form including the inspector’s signature, contact information, as well as printed name blocks.

All vehicles registered in the State of Delaware must have valid liability insurance coverage for the vehicle, listing your Delaware address. Please copy your insurance card and enclose along with renewal fee.

The Division will mail your new registration card and renewal sticker to your current out-of-state location.

OWNERS NAME: _____

REGISTERED ADDRESS: _____

CITY: _____ STATE: _____ ZIP CODE: _____

Please fill in your vehicle information, reason why vehicle cannot be inspected and the last date of inspection.

Registration Plate #: _____ Year & Make: _____

VIN #: _____ Expiration Date: _____

Color of vehicle: _____

Reason vehicle cannot be inspected in Delaware: _____

You must enclose a check or money order to be made out to the: Division of Motor Vehicles with this application. Renewal fee for your vehicle is \$_____. *Please keep in mind a **\$20 late** will be assessed for a renewal inspected after expiration date.*

FAILURE TO ENCLOSE THE CORRECT FEE AND/OR DOCUMENTS WILL RESULT IN THE DIVISION RETURNING ALL PAPERWORK AND DELAY YOUR RENEWAL.

*I certify under penalty of perjury that the statement herein and the information provided on DMV Forms 210(a) is true and correct to the best of my knowledge, information, and belief. I understand Delaware Law **REQUIRES** my vehicle to be **INSPECTED AT A DELAWARE DIVISION OF MOTOR VEHICLES INSPECTION STATION WITHIN 10 DAYS OF THE VEHICLES RETURN TO DELAWARE.***

EMISSIONS INSPECTION INFORMATION

***NOTE: Attach Emission analyzer printout to this form**

Delaware I & M Emission Standards

Group	Auto/Station Wagon	Pickup or Van Under 8501lbs	Hydrocarbon Limit (ppm)	Carbon Monoxide Limit (%)
1	'68 - '70	'70 - '72	900	9
2	'71 - '74	'73 - '78	600	6
3	'75 - '79	'79 - '83	400	4
4	'80	XXXXXXXX	220	2
5	'81 - '95	'84 - '95	220	1.2

READINGS:

HC (PPM)

CO (%)

Low Speed (curb idle)

High Speed (2500 rpm)

ON BOARD DIAGONSTICS (OBD II)

OBD II/Malfunction Indicator Light (MIL) testing is required for 1996 and newer vehicles. On Board Diagnostics is a complex computer system installed in 1996 and newer cars and light trucks. All power train diagnostic trouble codes fail Delaware inspection as well as an inoperable malfunction indicator light. Rejection due to readiness monitors not being set to a ready status will also fail Delaware inspection.

***NOTE: Attach OBD II test results to this form**

1. After making the DLC connection, the technician shall perform the Key On, Engine Off (KOEO) test to determine if the Malfunction Indicator Light (MIL) is properly functioning. If the MIL is not illuminated in the KOEO, the vehicle FAILS.
2. The technician shall start the vehicle, performing a Key On Engine Running (KOER) test.
3. The technician collects data from the computer of the vehicle. During the test, The Diagnostic Trouble Codes (DTC) and readiness indicators (if any) are obtained.
4. The technician turns the vehicle off and disconnects the DLC connector.

For vehicles that fail for computer not-ready on test:

- The customer should be told that the vehicle has failed for OBD not-ready. If the vehicle has been repaired or a battery replaced, they need to complete a drive cycle to ensure the vehicle is ready to test.

KOEO - MIL SHOULD BE ILLUMINATED

MIL ON _____ MIL OFF _____

KOER - MIL SHOULD NOT BE ILLUMINATED

MIL ON _____ MIL OFF _____

Diagnostic Trouble Codes (DTC), List any DTC's:

_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____

Readiness Monitor Status: Ready, Not Ready or Unsupported

1996 – 2000 model year vehicles may have 2 monitors not ready and pass, 2001 and newer vehicles are allowed only 1 monitor not ready. Please note any not ready monitors.

Comments: _____

I certify under penalty of perjury that the statement herein and the information provided on DMV Forms 210(a) is true and correct to the best of my knowledge, information, and belief. I certify that all equipment was inspected or tested and found in good/safe working order. If any item was not in good or safe working order it was documented above as a fail or unsafe condition and the customer will not be able to renew their registration until the item or test passes. I've attached any test result print outs if available.
